DR. TALMAGE'S DISCOURSE ON A MIGHTY INSTITUTION.

BROOKLYN, Nov. 4. - At the Taberna-

cle this morning, the Rev. T. De Witt Talmage. D. D., expounded some pasripture about ancient politics.

The dactor's text was: "Two cubits cable and a half the breadth of it, and a cutit and a cutit and a cutit and a laif the height of it."—Exodus xxxvii, 1. He said:

Look at it—the sacred chest of the ancients. It was about five feet long, three sand attempted fraudulent votes in the cients. It was about five feet long, three fret wide and three feet high. It was within and out of pure gold. On the top of it stood two angels facing each other with outsprend wings. In that sacred box was the law, and there were in it a great many precious stones. With that box went the fate of the nation. Carried

But is not this nation God's chosen people? Have we not passed through the Red sea? Have we not been led with a pillar of fire by night? Has this nation no ark of the covenant? Yes, the hallot box, the sacred chest of the nation, the ark of the American covenant.

THE MIGHTINESS OF THE BALLOT BOX. O'Connell and Grote and Cobden and Moses work and after a while you tell him there is an uncle or an aunt, or a box in England, and today it is one of the fastnesses of that name has the series of the corner stones of our government. It is older than the conner stones of our government. It is older than the conner stones of our government. It is older than the conner stones of our pational safety. Tell may be a single of the sum of the series in the insection of the same in the case of the conner stones of our government. It is older than the connection of the series of the ten and the series of the ten and the series of the conner stones of the conner stones of our government. Either give them the ballot or they will take the sword. Without the ballot box there can be no free republican institutions. Milton visiting in Italy no-ticed that on the sides of Vesuvius gardeners and farmers were at work while the volcano was in eruption, and he asked them if they were safe. "Yes," said the farmers and the gardeners, "it is safe; all the danger is before the cruption; then comes earthquake and terror, but just as soon as the volcano begins to pour forth lava we all feel at rest," It is the suppression of political sentiment, the suppression of public opinion, that makes moral earthquake and national earthquake. Let public opinion pour forth, and that gives satisfaction, and that gives peace, and that gives permanency to good government. And yet, though the ballot box is the sacred chest and the ark of the American covenant, you know as well as I know it has its sworn antago-God's name and as a Christian patriot to set before you the names of some of the sworn enemies of this sacred chest, the nists, and I propose this morning in ark of the American covenant, the ballot to provide money for the elections or with

There is no excuse for ignorance on these subjects in this land, where the common schools make knowledge as free as the fresh air of heaven. I would have a board of examination scated beside the officers of registration, and let them decide whether the men who come up to vote have any capacity to be monarchs in a land where we are all monarchs. One of the most awful foes of the American ballot box today is popular ignorance. Educate the people, give them an opportunity to know and understand what they do. Fishing for bass and pickerel is just as good as it has been for years and the care do not see their legs than the lexit season after they are hatched, which shows they are of very slow growth.

Occasionally a story describing a frog farm has been printed in some of the papers. Mr. Mather says he has investigated every story that seemed to be true who, it was thought, would relish the been for years, and the care do not seem to have interfered with the food supply of other fish. Catching carp is a novelty to an angler, but be soon tires of it, and the result is that they are being let alone, and when caught by accident they are generally thrown back into the water. The carp, consequently, have everything their own way, and are continuing to multiply until they threaten to take rank among the fishes which the English sparrow occupies among the birds of this country.—New York Herald.

Death from Tight Lacing.

Last year's coroners' inquests in England furnished two examples of death resulting from tight lacing. The last case was of a young lady suffering from fatty in following the contractors of the contractors of the heart, who died sudificating the absorption of copper by the workmen.
